

OSU Community Transit resumed operation July 7, 2020 on the reduced summer schedule. Buses will return to normal operation with all routes available and BOB will resume shuttle service on August 17, 2020.

The return to service includes new guidelines in an effort to protect employees and passengers from the spread of the virus. Passengers are asked to:

Wear a mask when riding

Do not ride if you have symptoms

Enter and exit the bus at the rear door on Community Routes

Other public/private transportations may be available in your area

All bus driver areas will be sectioned off to allow for 6' or greater separation from the passengers allowing safe operation of the vehicle without a mask.

All public transit buses in service will have high-touch surfaces cleaned daily. OSU Transit has contracted with Enviro-Mist for deep cleaning and sanitizing on a regular schedule. OSU Transit will also supply hand sanitizer in all buses.
