

OSU Community Transit resumed operation July 7, 2020 on the reduced summer schedule. Buses will return to normal operation with all routes available and BOB will resume shuttle service on Aug. 17, 2020. The return to service includes new guidelines in an effort to protect employees and passengers from the spread of the virus. Passengers are asked to:

Wear a mask when riding

Do not ride if you have symptoms

Enter and exit the bus at the rear door on Community Routes

Areas around the drivers will be sectioned off to create 6-feet or greater separation from the passengers, allowing drivers to safely operate their bus without a mask. All public transit buses in service will have high-touch surfaces cleaned daily. OSU Transit has contracted with Enviro-Mist for deep cleaning and sanitizing on a regular schedule. OSU Transit will also supply hand sanitizer in all buses.
